

Limites Exponenciais

$$\lim_{n \rightarrow +\infty} \left(1 + \frac{1}{n}\right)^n = e$$

$$\lim_{x \rightarrow 0} (1 + x)^{\frac{1}{x}} = e$$

$$\lim_{x \rightarrow 0} \frac{a^x - 1}{x} = \ln a$$

$$\lim_{n \rightarrow +\infty} \left(1 + \frac{1}{n}\right)^{2n} =$$

$$\lim_{n \rightarrow +\infty} \left[\left(1 + \frac{1}{n}\right)^n\right]^2 = e^2$$

$$\lim_{n \rightarrow -\infty} \left(1 + \frac{3}{n}\right)^n =$$

façá $w = \frac{n}{3}$, então $n = 3w$

$$\lim_{w \rightarrow -\infty} \left(1 + \frac{3}{3w}\right)^{3w} =$$

$$\lim_{w \rightarrow -\infty} \left(1 + \frac{1}{w}\right)^{3w} =$$

$$\lim_{w \rightarrow -\infty} \left[\left(1 + \frac{1}{w}\right)^w\right]^3 = e^3$$
